

MASK MS28-CA INSTALLATION KIT

The Mask installation kit comprises of the following parts listed, joining up to 4 x Mask speakers into one central array. Care must be taken to fit all parts as indicated and all fittings should be checked regularly for tightness due to vibration. If audio is used continually giving much vibration, it is advisable to use "Threadlock" or other recommended solution to help keep parts tight over extended use.

1. 1 x Centre pole
1 x Square block fitting
1 x Round cap
1 x Ring connector.
Assorted bolts, locking washers and washers.

2. There are 2 x metal plates (fitted to opposite brackets), plus assorted bolts and washers for fitting.

3. 1 x audio connector PCB.
Audio source top pair, 4 x speaker connectors Red + Black - Assorted bolts and washers for fitting.

4. 8 x Bolts, washers and nuts to join the brackets supplied with each Mask cabinet into a central array.

5. 4 x Bolts, 2 x washers to join the Pole assembly to the Mask brackets.

6. Make audio connections to the PCB and fix the last bracket.

7. Completed brackets for 4 x speakers. Mount the Mask speakers in the normal way, taking care to ensure good connection.

Note: This multi fitting kit requires to be fitted by a competent engineer and care should be taken to assemble it as shown and make sure that it is arrayed and hung in a safe position. Regular checks should be made for vibration movement and suitable steps taken to ensure secondary safety when hung above head height.
